

October, 1, 2004

Dear Sirs:

I am greatly concerned that the introduction of new Low Power FM stations may have a negative effect on our ability to receive one of our favorite radio stations, **K-LOVE**. My family and many of our friends love this station and listen to it a lot. **There are no other stations like** (in terms of programming content) **it in our area**. Please do not harm their ability to broadcast to us and hundreds of thousand of other citizens! Giving priority to LPFM stations could result in them going off the air.

This station provides hundreds of thousands of citizens across the country with encouraging, uplifting, life-changing broadcasting--something America needs more of!! Christians comprise a large percentage of the population. We **are** the public. To limit our access to music we enjoy and programming we benefit from, would not only hurt the overall positive impact on the community as a whole, but would deny us our rights as citizens. Rock, or jazz, or country, or talk radio **do not** "serve the public interest" **more** than Christian broadcasting does.

If you could hear the stories of all the people whose lives have been changed or helped through **K-LOVE** you would understand how **important** it is to the public to keep this kind of programming on the air. Please limit LPFM so that our great station is not restricted from reaching out with help and hope for the public.

Comment:

Gratefully,
Linnea Ebersole
